25X1 [ ]  
I still don't understand your point with these papers.

The Office of Communications is not going to be concerned with a communications problem until such a problem has been defined. At the moment there has been no problem definition, nor does it seem to me that there is likely to be one. Again, the system for moving documents-records material from Headquarters [ ] and back is yours. If that system presents a problem requiring fancy communications, you have to define it, do the system analysis and produce a proposal for a solution which can be acted upon. Only then will Commo become concerned.

25X1

I have the same difficulty with your proposed memo to the IP Coordinators. The purpose of the memo is obscure. As IP Coordinator for the DD/S, I wouldn't know what you are after and consequently I would have no idea about how to respond.
